

Creative Development

As part of our topic we will send some opportunities for some art activities. Please send us pictures of your wonderful work!

We also always include music as part of our weekly assembly.

Physical Development

If your child has a physio programme please continue working on this at home. We'd love to see photos of how you're integrating it into your home life! We understand that it is tricky to provide outside opportunities however, there are lots of online resources to help you keep active if you don't have a physiotherapy programme!

Joe Wicks provides a daily YouTube PE lesson

'Go Noodle' have fantastic movement resources (www.gonoodle.com)

Keep an eye on the 'Bumblebee physiotherapy' Facebook page for adapted PE.

Computer and media

In our topic tasks we will be asking you to ask questions!

You may need to use a computer to answer them by typing into google.

Please write out what you want them to google and allow them to type if possible.

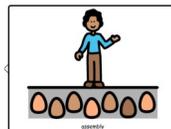

Please always supervise your child when using the internet.

CURRICULUM MAP

FORMAL PATHWAY

Summer 2 2020

'Every Achievement Counts'

Formal Pathway:

Communication, Phonics and Reading

We will be providing reading books over the half term.

For children that are 'Emerging Readers' they will continue to work on building sentences to comment on books with their communication supports.

For our 'Early Readers' they will continue to use their phonics and any known red/sight words when reading the books provided. Please model and support them with this.

'Developing Readers' will continue to use their reading skills to read the stories and answer questions about what happened in them.

We will also send home a book for parents to read with their parents.

We will also be sending some simple phonics activities to practice skills in blending sounds. Please also use the appropriate phonics videos on the Youtube channel.

Writing For a Purpose: This half term we are learning about how to gain information. This will be through asking questions but also beginning to use the internet to search for answers!

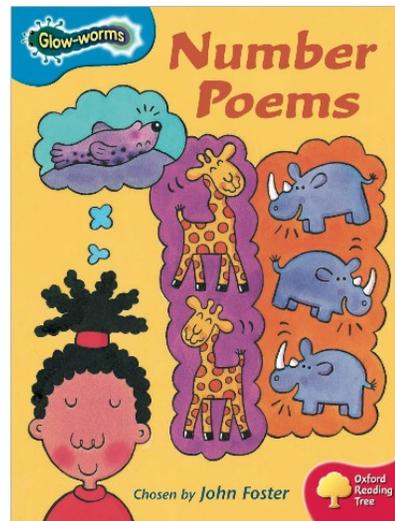

Mathematics

This half term we will be going back to looking at our numbers and new skills in counting as well as practicing those we have already learnt.

Counting On: Can you start at a number that isn't 1 and count up from there?

Addition: Can we add 2 numbers together and get something bigger? Can we use our numbers and signs to write a sum?

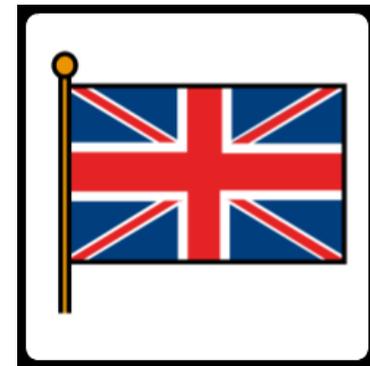

We will also be sending some number poems for you to read together at home and see numbers in action!

Topic Focus: Geography

We are going to be looking at The British Isles. Building on from looking at our homes we will look at different countries in Britain and what makes them special.

Karen will still be sending her work for Karen's corner. She has lots of ideas so watch out for them!

PSED/SEMH

Please continue to use the Zones of Regulation at home. If you need any help with this please email your class teacher or OT.

We also think it is important to share all your learning success and achievements with the rest of the school community. Please send us photos and emails of what you have been doing and we can share these via Instagram or the weekly newsletter.
